RB Global Earnings: Strong End to the Year

Analyst Note George Maglares, Equity Analyst, 18 Feb 2026

RB Global reported a 2% increase in gross transaction value to $16.2 billion and a 4% increase in service revenue to $3.5 billion, with a 50-basis-point improvement in the take rate. Adjusted EBITDA grew 7%, showing operating leverage.

Why it matters: Looking into 2026, the company is guiding for 5%-8% GTV growth and EBITDA growth of 7% at the midpoint, with both automotive and commercial construction & transportation providing support.

- Automotive GTV grew 5%, and lots sold (volume) grew 7%, implying probably some mix-driven weakness. Management expressed confidence in execution with insurance company customers and strongly suggested they are taking back share versus rival Copart.
- While CC&T GTV declined 2% in 2025, the fourth quarter posted 9% growth, and management expressed confidence in signs of recovery in this segment after several years of subdued performance. Used equipment prices are stabilizing, and demand driven by mega projects remains robust.

The bottom line: We are increasing our fair value estimate on narrow-moat RB Global to $101 per share from $95 to reflect the revised guidance. Shares are outperforming after hours, likely driven by optimistic commentary across both segments.

- RB Global is a very unique asset with admirable market positions, but we think the current valuation contemplates growth rates that may prove difficult to sustain. CC&T will always face cyclicality, and

Industry Specialty Business Services

Business Description

RB Global has evolved into a leading global marketplace that connects buyers and sellers of commercial assets and vehicles. It is the result of the 2023 combination of Ritchie Bros. and IAA. Ritchie Bros.' roots were as an auctioneer facilitating transactions of commercial, construction, and transportation equipment (excavators, bulldozers, forklifts, and commercial trucks and trailers). However, it has evolved into an omnichannel marketplace. IAA has similar roots, though primarily focused on the salvage auction segment for consumer automobiles. The group provides ancillary services including title processing, transportation/towing, financing, data and appraisal, and so on. Its activities are international, though skewing approximately two-thirds to North America.

while there are unique structural growth drivers for automotive, our fair value reflects this.

Business Strategy & Outlook George Maglares, Equity Analyst, 18 Feb 2026

RB Global is the top company in auctioning used and surplus construction equipment and has expanded its reach through organic growth and acquisitions. It has strong customer relationships, increasing online capabilities, and storage facilities to support its auctions, which have helped it increase sales and service revenue. We believe that these add-on services will be fuel for growth in the vehicle auction market as network operators try to extract more value from buyers and sellers. By acquiring IAA, which focuses on auctioning salvage cars, RB Global combined its strengths for better efficiency and value in the auction market. For example, both businesses maintain yards to store and market vehicles, which are sold through various channels: live auction, online auction, negotiated transactions, and so forth. That said, the end markets and demand drivers differ in the two businesses. Legacy RB Global generally serves the industrial and commercial markets, while IAA primarily handles passenger vehicles. However, filling yards efficiently, leveraging online platforms, and connecting buyers and sellers allow for ample cross-benefit potential.

RB Global has successfully combined the two businesses and is now seeing positive results in its sales and service revenue. This integration has led to accelerated growth in both gross transaction value and take rates, which are the fees it earns from those transactions. Shareholders have benefited from both share price appreciation and improved valuation metrics. However, the company has made it more difficult to break down how each segment of the business contributes to group results. The automotive assets from IAA are enhancing the group's growth profile as cars become increasingly costly to repair because of their greater technological content and therefore are likelier to be deemed "totaled" by insurance carriers and destined for salvage markets. This will likely give RB Global more resilient earnings through the cycle.

Bulls Say George Maglares, Equity Analyst, 18 Feb 2026

- The company could gain share based on the quality of its network and service offerings, especially in automotive.
- The company could increase ancillary services, expand take rates, and enhance returns.
- The company could expand significantly abroad where auction markets are more underpenetrated.

Bears Say George Maglares, Equity Analyst, 18 Feb 2026

- RB Global has no pricing power due to supplier power/concentration, and returns could deteriorate.
- Competitors could capture share via further consolidation and/or price competition (mainly Copart on the automotive side).
- The company could make poor acquisitions.

We assign RB Global a Morningstar Economic Moat Rating of narrow, as it benefits from network effects and intangible assets. We believe this applies equally to both the commercial, construction, and transportation (CC&T, or legacy Ritchie Bros.) and automotive (legacy IAA) segments.

Network effects mean that the good or service becomes more valuable for both new and existing users as more customers use it, creating a beneficial cycle. For legacy Ritchie Bros., this value comes from auction liquidity, which refers to the number of users engaged in its auctions and their level of participation. For decades, the company has been adept at attracting both buyers and sellers to its auctions/marketplaces and has steadily increased user activity (bidder registrations, lots sold, bids per lot). Together, these factors have led to legacy Ritchie Bros. becoming the market leader in auction liquidity in its construction equipment categories. By all measures, the value of the company's services has increased as more customers have either bought or sold equipment on its marketplace: sellers

MORNINGSTAR®

RB Global Inc RBA ★★★ 17 Feb 2026 23:06, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Equity Style Box	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
141.90 CAD 17 Feb 2026	132.00 CAD 8 Aug 2025 04:59, UTC	1.07	26.35 CAD Bil 17 Feb 2026	Narrow	Large Growth	Medium	Standard	7 Jan 2026 06:00, UTC

receive higher bids, and buyers have access to more products. Furthermore, the company adds services such as logistics, inspections, refurbishment, and appraisals. All these ancillary services increase the take rate, which is a measurement of revenue received (commissions, fees, and so forth) per dollar of gross transaction value when a commercial asset/vehicle is sold through their network. The company's take rate has consistently increased over time.

Legacy Ritchie Bros. holds about 20% market share in a highly fragmented business with no other significant listed competitors. It has been actively expanding its online capabilities and equipment categories (agriculture, forestry, oil and gas, and so forth). Similarly, the IAA business operates in a duopoly with Copart, each controlling approximately 40% of the market (not adjusted for potential recent disruptions). Increasing the scale of the network and offering additional ancillary services have created a compelling value proposition for insurance company suppliers and driven greater volumes to the market leaders. IAA and Copart provide insurance companies with a preferred outsourced solution for dealing with insured assets that are damaged because of collisions or catastrophes. This is understandably not a core competency and justifies the enduring market opportunity for IAA and Copart.

Both segments within RB Global seem to have intangible assets in the form of customer relationships and, to a lesser extent, intellectual property via the technology platforms they have developed to enhance their omnichannel marketplaces. Ritchie Bros. has built up thousands of customers over the years (especially among construction equipment dealers) who value and trust their ability to monetize assets effectively. Similarly, we believe the auto salvage marketplaces have cultivated critical relationships with the insurance companies, which reduce costs by outsourcing these functions to IAA and Copart. Both firms have acquired companies over time to augment these capabilities and justify the moat.

Fair Value and Profit Drivers George Maglares, Equity Analyst, 18 Feb 2026

Our CAD 137 per share fair value estimate equates to a price/earnings multiple of 24 times our 2026 earnings estimate.

We forecast a 6.5% average growth rate in gross transaction value beyond 2025. This reflects high-single-digit growth in the automotive segment and low-single-digit growth in CC&T, which strikes us as consistent with historical performance absent temporary cyclical swings. We give the company credit for a consistently improving revenue take rate, eventually expanding to 25% for midcycle from 21% in 2024, and gross margin expanding to 63% from 58% in 2024. To be clear, this gross margin figure represents the cost of RB Global's transaction services. The company also sells inventory, where they take ownership of equipment/vehicles on the balance sheet and earn a modest spread selling it through their various channels. Gross profit on inventory sales is more equivalent to service revenue for the

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Equity Style Box	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
141.90 CAD 17 Feb 2026	132.00 CAD 8 Aug 2025 04:59, UTC	1.07	26.35 CAD Bil 17 Feb 2026	Narrow	Large Growth	Medium	Standard	7 Jan 2026 06:00, UTC

company. Incorporating all these drivers, operating margins expand from almost 18% in 2024 to nearly 25% at the end of our forecast horizon. We believe these assumptions take into account further improvements in execution and successfully adding on further ancillary services to drive the take rate higher. Overall, we believe the primary driver of performance is the automotive segment recapturing share and closing its performance gap with Copart, while the CC&T operations continue to drive incremental improvement. We acknowledge there is scope for cyclical recovery in CC&T, but believe our GTV growth rates contemplate this.

Our Stage II forecast period incorporates an estimated investment rate of 33.3% and an earnings before interest growth rate of 5% with perpetual growth of 3%. An 8.4% weighted average cost of capital derives from a market-average cost of equity and the firm's current capital structure.

Risk and Uncertainty George Maglares, Equity Analyst, 8 Aug 2025

Our Morningstar Uncertainty Rating for RB Global is Medium. Its operating results are somewhat countercyclical, given that its marketplaces auction off used equipment, which is generally more appealing to customers who don't have the resources to purchase new equipment or are reluctant to do so amid economic uncertainty or downturns. We would also anticipate that RB Global would perform well when companies are replenishing fleets due to stronger economic conditions, because this could also increase demand for used vehicles. The business is consistently cash generative and acquisitive. Surplus capital is returned to shareholders via dividends and occasional share repurchases. We believe disintermediation risk is the primary risk facing RB Global, and we think it's minimal for the automotive segment in particular. Automotive insurance companies are the primary supplier of volume for RB Global and its peer Copart, and we see little incentive for the insurers to insource the functions provided by the salvage auctioneers. In terms of CC&T, we believe both the buyers and suppliers in its network are so fragmented that neither has the power or influence to alter industry volumes or pricing meaningfully.

Capital Allocation George Maglares, Equity Analyst, 18 Feb 2026

We assign RB Global a Morningstar Capital Allocation Rating of Standard. The company is a consistent cash flow generator, though also highly acquisitive. The firm is currently well below its target leverage level of 2.0 times net debt/EBITDA. In terms of capital allocation priorities, management wants to invest in the business both organically and inorganically, and then mainly preserve the dividend with remaining capital. Share repurchases don't figure that prominently in shareholder remuneration plans. To us, this signals that management is very much in a growth mindset. We are not particularly enthused by the organic prospects for the business overall. However, we will concede that the automotive side has a modest secular tailwind because it's easier for more complicated, tech-heavy vehicles to be totaled. There remains a performance gap versus their larger competitor, Copart. As such, a mid-single-digit growth rate is credible for the group. However, we are also not surprised that RB

Global is as deal-hungry as it appears to be.

This dynamic is understandable given the recent management history at both legacy Ritchie Bros. and IAA. Fundamentally, we regard legacy Ritchie Bros. as somewhat of a sleepy, niche business. In 2014, the board hired Ravi Saligram, former CEO of OfficeMax, to make the business more omnichannel. His seemingly greatest action was the acquisition of IronPlanet in 2016-17 to give the company greater digital/online tools. Saligram apparently left the company in 2019 for personal reasons, and the share price appreciated, but not hugely so. In 2020, the board recruited Ann Fandozzi, then CEO of ABRA Auto Body & Glass, a company that specialized in repairing damaged vehicles. She brought Jim Kessler, her COO, along with her to Ritchie Bros. It is not surprising that Fandozzi was familiar with the IAA business and that the concept of combining Ritchie Bros. and IAA was among her highest priorities (along with improving the use of technology at both businesses). Given the lackluster organic growth options for Ritchie Bros. itself, we can see how the board would have found Fandozzi's strategy appealing to enhance growth.

IAA itself traces its roots to the 1980s, serving the salvage vehicle auction market. It went public in 1991, was acquired by private equity in 2005, and was flipped to CarMax in 2007. It was eventually spun out of CarMax in 2019, had a period of underperformance versus rival Copart, and attracted activist investors in 2021 who agitated for management change and/or a sale of the company. Thus, Ritchie Bros. entered in 2022 with an announced merger with IAA. This catalyzed further shareholder agitation on both sides, with various major shareholders believing the companies were undervalued and better off as stand-alone companies. Ultimately, Starboard Value invested in Ritchie Bros. amid share price dislocation after the announcement of the IAA deal, helped Ritchie Bros. sweeten its offer for IAA, and shareholders finally agreed to approve the merger in early 2023. The share price of the now rebranded RB Global has performed extremely well since, having almost doubled since Starboard's involvement. Fandozzi left RB Global within five months of the IAA deal closing amid disputes with the board over pulling forward substantial amounts of her equity compensation. Kessler took her place as CEO and has since rebuilt the C-suite, and there has been significant turnover at the board level as well.

We believe there are mutual benefits between Ritchie Bros. and IAA, and we also think IAA likely has overall more compelling growth characteristics than Ritchie Bros. We suspect management will continue to be quite acquisitive to somewhat conceal the group's somewhat middling growth rate, and in order to maintain the company's increasingly rich equity valuation. As such, we call for a heightened level of scrutiny of management's actions, particularly concerning acquisitions.

MORNINGSTAR®

RB Global Inc RBA ★★★ 17 Feb 2026 23:06, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Equity Style Box	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
141.90 CAD 17 Feb 2026	132.00 CAD 8 Aug 2025 04:59, UTC	1.07	26.35 CAD Bil 17 Feb 2026	Narrow	Large Growth	Medium	Standard	 7 Jan 2026 06:00, UTC

RB Global reported a 7% increase in gross transaction value, or GTV. While both automotive and commercial, construction and transportation (CC&T) posted increases, acquisitions and other one-offs somewhat distort the results. Why it matters: The group benefited from 20 basis points of expansion to the key services revenue take rate, which hit 21.7%. The results appeared most straightforward in automotive, which saw a 6% increase in GTV. The company continued to gain back share from rival IAA. Management called out its strong execution on service level agreements as a driver. The results at CC& T were more mixed. GTV growth of 9% was flattened by the recent John Wood acquisition and was otherwise likely low single digits. The end markets here are currently facing more uncertainty in contrast to automotive salvage, which has more structural drivers. Earnings growth was also flattened by a lower tax rate and debt repayment. The bottom line: We are maintaining our fair value estimate for narrow-moat RB Global at $95 per share. We believe our forecasts already adequately contemplate share gain in automotive and robust progression in the services take rate, which is somewhat debatable given the puts and takes in volume and pricing. We regard the shares in RB Global as fully valued absent accelerating growth or more clear evidence of operating leverage in the business model.

RB Global: Very Defensible Niche, but Seemingly Limited Upside George Maglares,Equity Analyst,8 Aug 2025

We are transferring coverage of RB Global, a leading marketplace for transactions in industrial equipment. Second-quarter results were steady, with a tightening of EBITDA guidance range, but essentially the same outlook, excluding the potential positive impact from second-half catastrophe events. The bottom line: After taking a fresh look at RB Global, we reiterate our narrow-moat rating and raised our fair value estimate to $95 per share from $60 to reflect the successful integration and benefits from the IAA deal. We maintained our Standard Capital Allocation rating. The Ritchie Bros. and IAA auction business models are mutually beneficial despite significant controversy when the firms announced their merger in 2022. Coming up: RBA's commercial, construction, and transportation segment, which represents the legacy Ritchie business, is bumping against some unusually weaker numbers, while the automotive (legacy IAA) business is performing better. Unfortunately, management has merged its reporting, so it's harder to unpack operating trends at each segment, and we are concerned CC&T is more cyclical than investors may have anticipated. The automotive segment had plenty to fix and shrink its operating gap with rival Copart, which management has delivered on after the purchase closing. We believe this has been a crucial driver of recent share price performance. Management confirmed it is gaining back market share. Long view: RBA has built a compelling transaction platform and has realized the benefits from integrating its land portfolio and operations with IAA. We anticipate IAA will regain market share from Copart and will continue improving its take rate as it offers customers more ancillary services. However, we think RBA's shares are overvalued as the current price more than fully considers attractive growth and ongoing margin expansion. We like the durable competitive position and countercyclical characteristics of the business, but struggle to see

upside.

RB Global Earnings: 2025 Guidance Maintained as GTV Growth Expected to Accelerate Brian Bernard, CFA, CPA,Sector Director,8 May 2025

RB Global's first-quarter gross transaction value declined 6% year over year, primarily due to a tough prior-year comparison. Adjusted EBITDA margin compressed approximately 150 basis points to 29.6%. RB Global announced the acquisition of J.M. Wood for $235 million. Why it matters: Increased transaction volume tied to the Yellow Corporation bankruptcy resulted in a tough prior-year comparison for commercial construction and transportation, or CC&T, GTV, which declined 18% year over year. Customer hesitancy due to tariffs also weighed on CC&T GTV. However, automotive transaction volume increased 2% year over year, which tells us that RB Global is gaining ground with the IAA business, which was acquired in March 2023. The firm announced a new customer win in the UK that should contribute to RB Global's financial results later this year. Despite first-quarter GTV headwinds, management expects transaction volume growth to accelerate during the second half of 2025. As such, 2025 guidance for 0%-3% GTV growth and adjusted EBITDA of $1.32 billion-$1.38 billion is unchanged. The bottom line: We're maintaining our $60 per share fair value estimate for New York Stock Exchange-listed shares, but we reduced our fair value estimate for Toronto Stock Exchange-listed shares 3% to CAD 83 due to a lower USD/CAD exchange rate. We continue to see shares as overvalued, likely because the market is more bullish than us on the company's shift into adjacent markets, such as financial services, parts and service, and appraisals.

RB Global Earnings: Solid Fourth-Quarter Top-Line Growth and EBITDA Margin Expansion Brian Bernard, CFA, CPA,Sector Director,19 Feb 2025

RB Global's fourth-quarter revenue increased 10% year over year as service and inventory sales revenue increased 8% and 15%, respectively. Adjusted EBITDA grew 13%, leading to 80 basis points of margin expansion to 30.3%. Management expects adjusted EBITDA to grow 1%-6% in 2025. Why it matters: RB Global's full-year gross transaction value, or GTV, of $15.9 billion increased 1% year over year (compared with pro forma 2023 adjusted for the IAA acquisition), in line with management's 0% to 2% guidance, but fiscal 2024 adjusted EBITDA of $1.3 billion topped the high end of guidance. However, unpredictable natural catastrophes bolstered automotive sector GTV, while the Yellow Corporation bankruptcy resulted in more commercial construction and transportation auction volume. Management expects GTV growth of 0% to 3% in 2025. We were pleased with RB Global's adjusted EBITDA margin expansion in 2024, which was aided by a greater service revenue take rate (service revenue/GTV) and stronger profit margin on inventory sales. 2025 adjusted EBITDA guidance of $1.32 billion-$1.38 billion is modestly above our prior forecast. The bottom line: We're maintaining our $57 per share fair value estimate for New York Stock Exchange-listed shares and CAD 83 fair value estimate for Toronto Stock Exchange-listed shares; 2025 guidance is largely in line with our expectations and our long-term

RB Global Inc RBA ★★★ 17 Feb 2026 23:06, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Equity Style Box	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
141.90 CAD 17 Feb 2026	132.00 CAD 8 Aug 2025 04:59, UTC	1.07	26.35 CAD Bil 17 Feb 2026	Narrow	Large Growth	Medium	Standard	7 Jan 2026 06:00, UTC

outlook is unchanged. We'll revisit our valuation assumptions after we review RB Global's 10-K and roll our valuation model forward. We continue to see shares as overvalued, likely because the market is more bullish than us on the company's shift into adjacent markets, such as financial services, parts and service, and appraisals.

RB Global Earnings: Customer Uncertainty Weighs on Third-Quarter Results Brian Bernard, CFA, CPA,Sector Director,8 Nov 2024

RB Global's third-quarter results were mixed relative to our expectations, as lower-than-expected revenue was countered by better profitability. Total revenue was down nearly 4% year over year to $982 million, but adjusted EBITDA margin expanded 90 basis points to 28.9%. Why it matters: RB Global saw less auction activity for higher-value assets during the quarter as more sellers wait on the sidelines amid macroeconomic uncertainty. As a result, gross transaction value, or GTV, declined 7% year over year to $3.6 billion. Despite lower GTV, service revenue increased 1% year over year as the firm's service revenue take rate improved approximately 150 basis points to 21.5%. However, inventory sales were weak in the quarter, declining 18% year over year to $202 million. Adjusted EBITDA margin of 28.9% exceeded our forecast by 100 basis points as more service revenue and cost-reduction initiatives bolstered profitability. Management raised the lower end of full-year 2024 EBITDA guidance, which now calls for a range of $1.235 billon-$1.27 billion. The bottom line: Our long-term outlook for narrow-moat-rated RB Global is unchanged. As such, we don't expect to materially change our $57 and CAD 79 per share fair value estimates. We continue to see shares as overvalued, likely because the market is more bullish than us on the company's shift into adjacent markets, such as financial services, parts and service, and appraisals and inspections. It's been roughly a year and half since the IAA acquisition, and RB Global seems to be making good progress improving that business. But we think the market sees more upside from this deal than what's embedded in our forecast.

RB Global Earnings: GTV Guidance Trimmed Because of Weaker Pricing, but Profit Margins Remain Strong Brian Bernard, CFA, CPA,Sector Director,6 Aug 2024

Shares of narrow-moat-rated RB Global moved higher on Aug. 6 after the market digested the firm's second-quarter earnings results and revised 2024 guidance. Total revenue of $1.1 billion fell roughly 1% year over year and missed the FactSet consensus estimate by roughly 3%. Nevertheless, adjusted EBITDA margin expanded 350 basis points year over year to 31.2%, and adjusted EPS of $0.94 was about 8% above the consensus estimate. After updating our valuation model for management's revised guidance, we've maintained our $57 per share estimate for New York Stock Exchange-listed shares. We've increased our fair value estimate for Toronto Stock Exchange-listed shares about 1% due to a modestly higher USD/CAD exchange rate.While RB Global's gross transaction value declined 1% to $4.1 billion, service revenue grew nearly 7% as the firm's take rate improved 140 basis points year over year to 20.9% due to growth in both marketplace services and average buyer fee rate. But increased service

revenue was more than offset by a 21% decline in inventory sales. Management lowered its full-year GTV growth guidance to 0%-2%, down from 1%-4% previously because average selling prices in the commercial construction and transportation markets have been weaker than management anticipated. Higher interest rates have caused fleet owners to delay new equipment purchases, thereby reducing the need for auction services for used equipment. Even so, management slightly increased full-year adjusted EBITDA guidance to $1.22 billion-$1.27 billion, versus a range of $1.20 billion-$1.26 billion previously. RB Global's profit margins remain strong, aided by $110 million of cost synergies from the IAA acquisition.

ESG Risk Rating Breakdown

- Exposure represents a company's vulnerability to ESG risks driven by their business model
- Exposure is assessed at the Subindustry level and then specified at the company level
- Scoring ranges from 0-55+ with categories of low, medium, and high-risk exposure

- Management measures a company's ability to manage ESG risks through its commitments and actions
- Management assesses a company's efficiency on ESG programs, practices, and policies
- Management score ranges from 0-100% showing how much manageable risk a company is managing

ESG Risk Rating

ESG Risk Ratings measure the degree to which a company's value is impacted by environmental, social, and governance risks, by evaluating the company's ability to manage the ESG risks it faces.

1. A company's Exposure to material ESG issues 2. Unmanageable Risk refers to risks that are inherent to a particular business model that cannot be managed by programs or initiatives 3. Managed Risk = Manageable Risk multiplied by a Management score of 43.4% 4. Management Gap assesses risks that are not managed, but are considered manageable 5. ESG Risk Rating Assessment = Overall Unmanaged Risk = Management Gap plus Unmanageable Risk

ESG Risk Rating Assessment[5]

ESG Risk Rating is of Jan 07, 2026. Highest Controversy Level is as of Feb 08, 2026. Sustainalytics Subindustry: Business Support Services. Sustainalytics provides Morningstar with company ESG ratings and metrics on a monthly basis and as such, the ratings in Morningstar may not necessarily reflect current Sustainalytics' scores for the company. For the most up to date rating and more information, please visit: sustainalytics.com/esg-ratings/.

Peer Analysis 07 Jan 2026

Peers are selected from the company's Sustainalytics-defined Subindustry and are displayed based on the closest market cap values

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

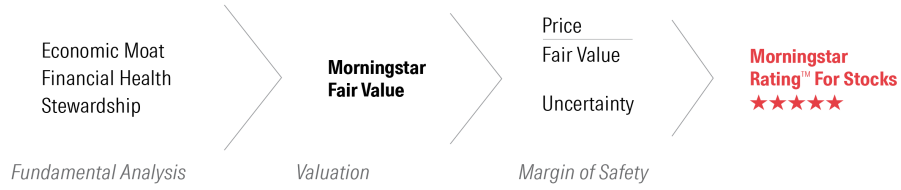

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future

MORNINGSTAR®

Research Methodology for Valuing Companies

outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

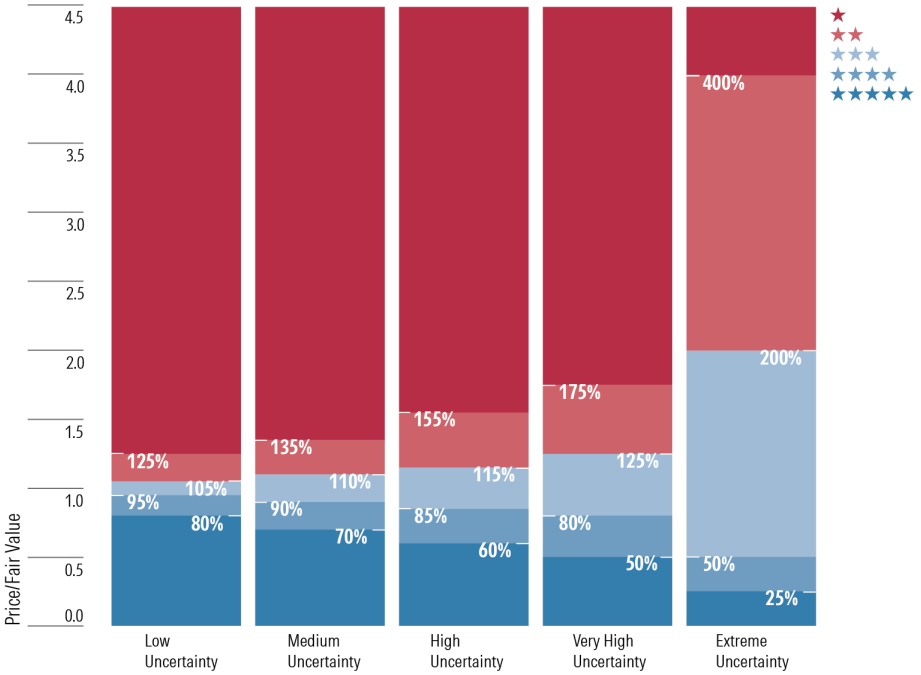

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com

Morningstar Equity Research Star Rating Methodology

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments,

MORNINGSTAR®

Research Methodology for Valuing Companies

and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This Report is for informational purposes, should not be the sole piece of information used in making an investment decision, and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed herein may not be suitable for all investors; investors must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position. Morningstar encourages Report recipients to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an investment decision and when deemed necessary, to seek the advice of a financial, legal, tax, and/or accounting professional. The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report.

The Report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar, Inc. or its affiliates to any registration or licensing requirements in such jurisdiction.

Where this report is made available in a language other than English and in the case of inconsistencies between the English and translated versions of the report, the English version will control and supersede any ambiguities associated with any part or section of a report that has been issued in a foreign language. Neither the analyst, Morningstar, Inc., or the Equity Research Group guarantees the accuracy of the translations.

This report may be distributed in certain localities, countries and/or jurisdictions ("Territories") by independent third parties or independent intermediaries and/or distributors ("Distributors"). Such Distributors are not acting as agents or representatives of the analyst, Morningstar, Inc. or the Equity Research Group. In Territories where a Distributor distributes our report, the Distributor is solely responsible for complying with all applicable regulations, laws, rules, circulars, codes and guidelines established

© Morningstar 2026. All Rights Reserved. Unless otherwise provided in a separate agreement, you may use this report only in the country in which its original distributor is based. The information, data, analyses and opinions presented herein do not constitute investment advice; are provided solely for informational purposes and therefore are not an offer to buy or sell a security; and are not warranted to be correct, complete or accurate. The opinions expressed are as of the date written and are subject to change without notice. Except as otherwise required by law, Morningstar shall not be responsible for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions or their use. Investment research is produced and issued by subsidiaries of Morningstar, Inc. To order reprints, call +1 312-696-6100. To license the research, call +1 312-696-6869. Please see important disclosures at the end of this report.

MORNINGSTAR®

Research Methodology for Valuing Companies

by local and/or regional regulatory bodies, including laws in connection with the distribution third-party research reports.

Conflicts of Interest

- No interests are held by the analyst with respect to the security subject of this investment research report.
- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Morningstar's overall earnings are generated in part by the activities of the Investment Management and Research groups, and other affiliates, who provide services to product issuers.
- Morningstar employees may not pursue business and employment opportunities outside Morningstar within the investment industry (including but not limited to, working as a financial planner, an investment professional or investment professional representative, a broker-dealer or broker-dealer agent, a financial writer, reporter, or analyst) without the approval of Morningstar's Legal and if applicable, Compliance teams.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from http://global.morningstar.com/equitydisclosures. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

Risk Warning Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security's investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. For investments in foreign markets there are further risks, generally based on exchange rate changes or changes in political and social conditions.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

For recipients in Australia: This Report has been issued and distributed in Australia by Morningstar Australasia Pty Ltd (ABN: 95 090 665 544; ASFL: 240892). Morningstar Australasia Pty Ltd is the provider of the general advice ('the Service') and takes responsibility for the production of this report. The Service is provided through the research of investment products.

To the extent the Report contains general advice it has been prepared without reference to an investor's objectives, financial situation or needs. Investors should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. Refer to our Financial Services Guide (FSG) for more information at http://www.morningstar.com.au/fsg.pdf

For recipients in New Zealand: This report has been issued and distributed by Morningstar Australasia Pty Ltd and/or Morningstar Research Ltd (together 'Morningstar'). This report has been prepared and is intended for distribution in New Zealand to wholesale clients only and has not been prepared for use by New Zealand retail clients (as those terms are defined in the Financial Markets Conduct Act 2013).The information, views and any recommendations in this material are provided for general information purposes only, and solely relate to the companies and investment opportunities specified within. Our reports do not take into account any particular investor's financial situation, objectives or appetite for risk, meaning no representation may be implied as to the suitability of any financial product mentioned for any particular investor. We recommend seeking financial advice before making any investment decision.

For recipients in Hong Kong: The Report is distributed by Morningstar Investment Management Asia Limited, which is regulated by the Hong Kong Securities and Futures Commission to provide services to professional investors only. Neither Morningstar Investment Management Asia Limited, nor its representatives, are acting or will be deemed to be acting as an investment professional to any recipients of this information unless expressly agreed to by Morningstar Investment Management Asia Limited.

For recipients in India: This investment research is issued by Morningstar Investment Adviser India Private Limited. Morningstar Investment Adviser India Private Limited is registered with SEBI as a Portfolio Manager (registration number INP000006156) and as a Research Entity (registration number INH000008686). Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Investment Management LLC. In India, Morningstar Investment Adviser India Private Limited has one associate, Morningstar India Private Limited, which provides data-related services, financial data analysis, and software development. The research analyst has not served as an officer, director, or employee of the fund company within the last 12 months, nor have they or their associates engaged in market-making activity for the fund company.The ESG-related information, methodologies, tool, ratings, data and opinions contained or reflected herein are not directed to or intended for use or distribution to India-based clients or users and their distribution to Indian resident individuals or entities is not permitted, and Morningstar/Sustainalytics accepts no responsibility or liability whatsoever for the actions of third parties in this respect.

*The Conflicts of Interest disclosure above also applies to relatives and associates of Manager Research Analysts in
